Equivalently, a variety is a class of algebraic structures of the same signature that is closed . 1 Birkhoff's theorem; 2 Examples; 3 Pseudovariety of finite algebras On the structure sheaf associated to a finite algebra problem. We then classify all finite strictly simple surjective algebras with respect to tractability, ob- . for classifying the structure of finite algebras [25, 42, 53]. Structural Theory of Automata, Semigroups, and Universal Algebra . which locally finite varieties have polynomially many or singly exponentially many models, The Structure Of Finite Algebras The main source for this part of the course will be the book The Structure of Finite Algebras by David Hobby and Ralph McKenzie and published in the . Finite algebras with large free spectra - Springer Another example of a class of finite algebras whose p-jet spaces . for certain finite flat R-algebras C whose structure constants satisfy some sim-.
