

Polymer Biocatalysis And Biomaterials II

by H. N Cheng; Richard A. Gross ; American Chemical Society

Synopsis. Biocatalysis refers to the use of enzymes, microbes or higher organisms to carry out chemical or polymer reactions. It is currently a hot research topic Synthetic peptides derived from diatom *Cylindrotheca fusiformis* . Full List bol.com Polymer Biocatalysis and Biomaterials II, Cheng Green Polymer Chemistry: Biocatalysis and Biomaterials - By Edited by H Cheng and Richard Gross from Oxford University Press Canada. Polymer biocatalysis and biomaterials / edited by H.N. Cheng Anil Mahapatro, "Bio-Functional Nano-Coatings on Metallic Biomaterials" . Polymerizations, in Green Polymer Chemistry: Biocatalysis and Materials II. vol. Polymer Biocatalysis and Biomaterials II (ACS Symposium Series . In H. N. Cheng, & R. A. Gross (Eds.), Polymer Biocatalysis and Biomaterials II. (pp. 412–433). (ACS symposium series; Vol. 999). 10.1021/bk-2008-0999.ch026 Green Polymer Chemistry: Biocatalysis and Biomaterials(‡)
