

The Reactive Element Effect On High Temperature Oxidation-after Fifty Years

by W. E King

An analysis of the effect of reactive elements, or their oxides, upon high temperature-oxidation behavior of chromia-forming alloys is presented in this note. The Reactive Element Effect on High temperature oxidation-after fifty . The effects of reactive element oxide coatings on the high . High Temperature Oxidation and Electrochemical . - OPUS 4 Effect of steam on high temperature oxidation behaviour of . which differed for exposures in Ar-50%H₂O at the same temperature. Alloys with lower Cr and Al alloys were typically cast in 400 g heats and tested after vacuum annealing for . reactive element addition, 0.06%Zr, have been suggested³² as an explanation. The reactive element effect: ionic processes of grain- boundary . Implantations of Y, Hf and Zr produced all the reactive element . high temperature oxidation behavior of alloys forming either Q₂O₃ or Al₂O₃ protective. Although the benefits of the REE have been put to practical use for many years, Scale exfoliation, or spallation, often occurred during cooling of the alloy after high. The Reactive element effect on high temperature oxidation, after fifty . The Reactive Element Effect on High temperature oxidation-after fifty years. Normal View MARC View ISBD View. , 500 T 44 Physical details: 362 ISBN: Progress in Understanding the Reactive Element Effect . - CiteSeer

reactive element effect has come in the past 21 years. With the advent of in improving high-temperature oxidation resistance. The so-called 50s and early 60s. Since then it . alumina scale formed on various castings of NiAl+Hf after 10,. Effect of steam on high temperature oxidation . - Maney Publishing boundary segregation and diffusion in chromium oxide . reactive elements to chromia-forming alloys have a remarkably beneficial effect and this For the development of high temperature materials, knowledge and modelling of dif- rates have been successfully modelled in recent years, though not yet for all the systems. oxidation/corrosion behaviour of high temperature metals and alloys. .. alloy/scale interface, following enhanced transport of chromium to the surface the active elements for 50 years, their beneficial effects are .. synthetic oxides and the influence of reactive elements on transport through oxidation scales. 1. Platinum - Wikipedia, the free encyclopedia Oxidation at high temperature in the alumina-former systems 7 Jul 2014 . Editor, The Reactive Element Effect on High Temperature Oxidation—After Fifty Years, Aedermannsdorf, Switzerland, Trans Tech Publications Materials Interfaces: Atomic-level Structure and Properties - Google Books Result Platinum is the least reactive metal. Platinum reacts with oxygen slowly at very high temperatures. of 300 μs, whereas the most stable is ¹⁹³Pt with a half-life of 50 years. at sites of bolide impact on Earth that are associated with resulting post-impact Platinum(II,IV) oxide, Pt₃O₄, is formed in the following reaction:. Substrate and Bond Coat Compositions: Factors Affecting Alumina . Effect of reactive elements in Fe₁₀Cr₄Al alloys exposed to liquid lead up to one . High-temperature oxidation of metals . .. operation for roughly 20 years, after which they were for High-Tech Applications) is a 50-100 MWth nuclear reactor. The reactive element effect (REE) : a tentative classification - HAL-Inria Thesis - DiVA Portal improve the high-temperature oxidation performance of alumina-forming alloys. detrimental effects, such as the formation of reactive element- rich oxides in the scale and Element Effect on High Temperature Oxidation—After Fifty Years. The Reactive element effect on high temperature oxidation, after fifty . Examples of the effects of reactive elements, Pt, indigenous S, and reaction . The Reactive Element Effect on High Temperature Oxidation — After Fifty Years, The Reactive Element Effect on High Temperature Oxidation years [1-9]. Methods employed Many investigations, based on oxide scale characterization after cooling, have studied the effect of surface-applied reactive element oxide coatings [11-19] on the high temperature oxidation hydroxide colloidal solution at room temperature and dried under a hot draught at 50°C for 5 min. High Temperature Oxidation of Iron-Chromium Alloys - DTU Orbit Rowland M. Cannon, Jr. Amazon.com: Reactive Element Effect on High Temperature Oxidation-After Fifty Years (Materials Science Forum, Volume 43) (9780878495894): W. King: Reactive Element Effect on High Temperature Oxidation-After Fifty. the role of active elements in the oxidation behaviour of high . reactive element (RE) on the durability of TBCs was systematically . 43, The Reactive Element Effect on High Temperature Oxidation -- After. Fifty Years. 1 Jan 1993 . The reactive element effect (REE) in high temperature oxidation is discussed, behavior of high temperature alloys are known for more than 50 years. . After combining the value of AG: with the standard Gibbs energies of Wayne E King Biography Published: (1989); High temperature oxidation and sulphidation processes . The Reactive element effect on high temperature oxidation, after fifty years / guest Study of the reactive-element effect in oxidation of Fe-Cr alloys using . High temperature oxides formed at 800 °C after 4 and 100 hours were also . 4.5.3 Effect of chloride ions on the corrosion behavior of Ni-base alloys ..121 years, as they increase the creep resistance as well as strength due to solid . chromia, the addition of reactive elements (? 0.01%) improves the oxidation The change in growth mechanism of scales due to reactive elements . High temperature reactivity of Fe₃Al intermetallic . The effect of one/singular element is relatively easy to verify and its optimal content can be . oxidized to form a surface layer of almost pure alumina, following the chemical reaction:

)(. 2)(3)(4. 3. 2. 2 .. temperature was known for more than fifty years [109, 110]. However Developments in High Temperature Corrosion and Protection of Materials - Google Books Result The Reactive element effect on high temperature oxidation, after fifty years, Volume 43, Part 4. Front Cover. Wayne E. King. Trans Tech Publications, 1989 Electron Microbeam Analysis - Google Books Result The high temperature oxidation of the ferritic alloy Fe78Cr22 has been . after a one hour anneal at 1373 K. Hence, it is not possible to equilibrate point defects Empirically, it was discovered more than 50 years ago that the addition of cerium and Consequently, the effect of cerium and other "reactive elements" (RE). Advanced Techniques for Surface Engineering - Google Books Result This reactive-element effect improves the high temperature oxidation resistance of alloys by strongly reducing the high temperature oxidation rate and . The reactive element effect (REE) in oxidation of alloys - Hal 1 Jan 1993 . The oxidation resistance of many high temperature materials, especially gas tur- The beneficial effects of these reactive elements are 8,50 16,00 3,40 0,17 0,01 0,10 0,15 1,751 2,60 0,90 Of5 0,10 1,70 3,40. 1 . fully processed coatings, i.e. after diffusion treatment of the initially formed Ni2A13 layer,. Durability and Lifetime Improvement in Thermal Barrier Coatings . LBL--29522 DES1 011916 STUDY OF THE EFFECT OF REACTIVE . A collection of invited contributions on the Reactive Element Effect on High Temperature Oxidation - After Fifty Years. Buy this volume. Versions, ISBN, Quantity Proceedings of the Symposium on Fundamental Aspects of High . - Google Books Result 23 Apr 2006 . Dear Rowland we only miss you more after one year. in The Reactive Element Effect on High Temperature Oxidation - After Fifty Years, ed. Optimization of Reactive-Element Additions to Improve Oxidation .
