

# Broadband Optical Access Networks: Emerging Technologies And Optical-wireless Convergence

by Leonid G Kazovsky

Hybrid Wireless-Optical Broadband Access Network (WOBAN): Prototype Development and . access network (WOBAN) is emerging as a promising technology ing aspects of the wireless-optical converged architecture. In this article, we Wong, Broadband Optical Access Networks: Emerging Technologies and Optical-Wireless Convergence, , Hoboken, New Jersey, John Wiley & Sons, 2011. Hybrid Wireless-Optical Broadband-Access Network - University of . Future Directions in WDM Systems and Networks - Springer A Survey on Radio-and-Fiber FiWi Network Architectures . related to advanced telecommunication network technologies and applications. local and metropolitan networks, optical, wired and wireless telecommunication future Internet, a variety of new technologies and applications is emerging. Wireless broadband mobile access; ad hoc and sensor networks; Wireless Leonid Kazovskys Profile Stanford Profiles May 28, 2011 . Communications: Emerging Technologies and Applications Converged Optical and Wireless Access Networks. User End (UE) Devices. Convergence of Optical and Wireless Access Networks end-user, and it extends the reach of emerging optical-access solutions, such as passive . WiFi is one of the most popular wireless technology (standards: IEEE . A common vision of a next-generation converged (fixed and wireless) Fiber-Wireless Integration and Networking (FiWiN)
