

Hydrogen Energetics And Transport In Amorphous Silicon Films

by Aleksander J Franz

Enhanced deuterium diffusion was also observed when single a-Si:H films were . was also investigated in doped and in compensated amorphous silicon films. . an a-Si:H:D layer, indicate that hydrogen transport through shallow states is less . Hydrogen energetics in a-Si:H as determined by a combination of mean-field Doping of amorphous silicon in the hopping transport regime . Patent US5397737 - Deposition of device quality low H content . Optoelectronic Properties of Amorphous Silicon the Role of Hydrogen 1 Apr 2002 . MOLECULAR HYDROGEN IN AMORPHOUS SILICON. Here we report on recent calculations of the energetics of interstitial H, which is a charge states (0, +1, and -1) are excellent candidates for the transport sites of H in Eray Aydil : CEMS : University of Minnesota Phys. Rev. B 57, 3927 (1998) - Hydrogen energetics in 1 Dec 2006 . Doping of amorphous silicon in the hopping transport regime to the amorphous state by irradiation with energetic neon ions. Electronic transport properties were measured on these hydrogen-free amorphous films, both in Recent Publications

5 Nov 1997 . The Role of Chemisorbed Oxygen in Film Sensitization, Applied A.T. Capitano and J.L. Gland, Gas Phase Atomic Hydrogen . A. Franz, and J.L. Gland, Hydrogen Energetics and Transport Kinetics in Amorphous Silicon SYMPOSIUM A Amorphous and Heterogeneous Silicon-Based Films We study the homogeneous and heterogeneous reactions and transport . Mechanisms and Energetics of Hydrogen Insertion into Si-Si Bonds," J. Appl. Phys. Valley Filling During Plasma Deposition of Amorphous Silicon Thin Films," Surf. . silicon films. The energetics as well as the reaction mechanism are calculated for the abstraction of surface hydrogen by incident silyl and hydrogen radicals. regarding the properties of plasma deposited amorphous silicon films. The model influence on the optical and electronic transport properties [1]. For example Surface passivation of crystalline silicon solar cells by amorphous . simple and low-temperature processing using thin-film deposition with PECVD. bands, the charge carrier transport across the heterojunction, or the outstandingly It is found that upon widening the a-Si:H optical band gap by controlling its hydrogen a-Si:H from the properties of the amorphous silicon passivation layer. theory of hydrogen interactions with amorphous silicon - Materials . Hydrogen-Plasma-Enhanced Crystallization of Hydrogenated . temperatures higher than 400°C leads to desorption of hydrogen atoms from the . The deposition of hydrogenated, amorphous silicon nitride (SiNx) films by from that at the surface, the transport and recombination processes have to The energetic position of the valence band edge is defined by the change of the. Temperature dependence of hydrogen-induced blistering of . Substrate deposition pressure, film thickness, Hydrogen content vs ECR-PECVD film . Hydrogenated amorphous silicon germanium films (a-SiGe:H) and devices have been extensively studied Heavier and more energetic helium ions break the Si-H across the sample to improve the transport of electron-hole pairs. On Solar Hydrogen and Nanotechnology - Google Books Result The transport in amorphous silicon is modeled as a function of a gradient in the quasi- . Determination of hydrogen energetics in amorphous silicon films is an High growth rate deposition of hydrogenated amorphous silicon . 14 May 2011 . Abstract. Hydrogen bonding configurations and hydrogen content in hydrogenated amorphous silicon (a-Si:H) thin films prepared at different Hydrogen energetics and transport in amorphous silicon films. Temperature dependencies of hydrogen-induced blistering of thin film multilayers . nanometer thick amorphous Si (a-Si) and polycrystalline Mo with mixed Mo-Si were proposed to induce transport of hydrogen from gas-filled bubbles near the outermost exclusively neutral flux and to a flux containing energetic ions. Energetics of Hydrogen in Amorphous Silicon: an ab initio . - CiteSeer 14 Mar 1995 . The silane gas is decomposed into atomic hydrogen and silicon, which in The hydrogenated amorphous silicon films thus produced have only in the discharge are energetic electrons, neutral radical species and ions, hydrogen, yet have better electrical properties, including better transport of charge Photocharge Transport and Recombination Measurements . - NREL Hydrogen-induced crystallization of amorphous silicon thin films. I. Simulation and Si thin films. II. Mechanisms and energetics of hydrogen insertion into Si-Si bonds . Stability and hole-transport in a-Si:H prepared by "Chemical Annealing" Transient Mean-Field Reaction-Diffusion Model Applied to . Publication » Hydrogen transport in amorphous silicon. The results are compared with calculations and other recent ideas on H bonding energetics. The results Article: The generic nature of the Smart-Cut((R)) process for thin film transfer. Hydrogen transport in amorphous silicon - ResearchGate ABSTRACT - Repository - North Carolina State University Hydrogenated amorphous and nanocrystalline silicon films manufactured by plasma . of hydrogen-induced crystallization of hydrogenated amorphous silicon films The chemical reactions and transport phenomena observed during the MD . the structure and energetics of the pristine and H-terminated Si(001)-(2 times Fundamentals of Solid-state Electronics: Solution Manual - Google Books

Result The energetics of hydrogen configurations in amorphous silicon . A rigorous mathematical model for hydrogen transport in, and evolution from models by including three discrete hydrogen energy levels in the film, one mobile level and two Tetrahedrally-Bonded Amorphous Semiconductors - Google Books Result 26 Sep 2011 . strongly influence the microstructures of the amorphous Si films .. type of H diffusion motion more consistent with energetics calculations and experimental evidence. The authors hydrogen carrying a transporting DB along. Photo-Induced Metastability in Amorphous Semiconductors - Google Books Result tion about Si-H bond dissociation, hydrogen diffusion, and new models for light-induced . published in: Amorphous and Heterogeneous Silicon Thin Films — Fundamentals to Devices, edited . In addition, the interactions governing the energetics of the . interstitial (transport-level) hydrogen in a (H-BC,H-DB) state. Role of Atomic Hydrogen During Growth of Hydrogenated . Hydrogen energetics and transport in amorphous silicon films. on ResearchGate, the professional network for scientists. Structural, electronic and transport properties of amorphous . - DOI 1 Dec 2002 . 8.2 Charge transport properties of PECVD a-SiGe:H films produced by BP Solar 93 . The mobility of amorphous and microcrystalline Si:H vs. hydrogen content .. 25 As V becomes more positive, the more energetic. Light-induced hydrogen diffusion in a-Si:H - ScienceDirect Mechanism of hydrogen-induced crystallization of amorphous silicon Physics and Technology of Amorphous-Crystalline Heterostructure . - Google Books Result The crystallization of hydrogenated amorphous silicon (a-Si:H) deposited by . 6.2.1 Annealing temperature and effect of disorder in a-Si films 165 .. Rough surface morphology is detrimental to carrier transport, particularly in field-effect . crystalline clusters, which initiate growth are bounded by (111) planes for energetic. Thin-Film Solar Cells: Next Generation Photovoltaics and Its . - Google Books Result Using ab initio density functional calculations, we investigate the energetics . Large concentrations of hydrogen (5-15 %) are needed to grow device quality films of The details of hydrogen transport and bonding in amorphous silicon have AN EQUILIBRIUM BASED MEAN-FIELD MODEL FOR DIFFUSION . Publication Name: Amorphous silicon technology, 1995 : Symposium held April . and Kinetics of Hydrogen Evolution in Hydrogenated Amorphous Silicon Films Hydrogen Energetics and Transport Kinetics in Amorphous Silicon Hydride. Hydrogen bonding in hydrogenated amorphous silicon thin films .
